

THE HENNER GROUP LAUNCHES ITS MOBILE HEALTHCARE APP, HENNER+

The Henner Group, a specialist in personal insurance and leading collective healthcare insurance provider, is pleased to announce the official launch of Henner+, the first mobile app providing members with a complete overview of their healthcare cover.

After several months of development and a test phase completed in September, the Henner Group has released Henner+, the first comprehensive mobile healthcare app for members in France.

Designed as a healthcare hub, Henner+ allows members to download their electronic **direct settlement card**, **submit claims by taking a simple photo**, view their **list of previous reimbursements**, and put together a **mobile healthcare record**.

Home page

“With Henner+, access your direct settlement card wherever you go, keep track of your healthcare reimbursements and much more!”

Explanation of benefits

Henner+ allows members to communicate more easily with their client services teams via a **secure messaging service**.

The app also provides the location and contact details of the 200,000 healthcare professionals working in France. The list is also available to non-members.

Olivier Perrichi, Associate Director at the Henner Group explains, Henner+ is an advanced, innovative mobile app designed specifically for our partner companies and members. Our objective was to simplify customer relations using the tools of today, while ensuring the complete protection of healthcare data.”

The app was designed by and for members who were consulted during the test phase and helped to give the app its added value in everyday use.

Henner+ is a simple and intuitive mobile app including various evolving functions including:

- explanation of benefits
- the location of healthcare partners
- the direct settlement card
- your personal medical details
- online requests for optical and dental quotes
- access to the secure message service
- access to your policy cover details
- the possibility of sending a photo of your supporting documents or invoices using the app
- healthcare news and quizzes

Nicolas Savin, Henner Marketing and Digital manager, explains, “Henner+ is the result of a joint long-term project involving our clients. They wanted more than just a healthcare management app. One of our aims was to provide a comprehensive range of functions that can evolve over time, while ensuring maximum confidentiality and data protection.

The release of the **international version of Henner+**, designed for members living abroad, is scheduled for early 2017.

The Henner+ app can be downloaded free for iPhone and Android devices.
